                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         9
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              The present invention relates to novel human NOVX proteins, where X is any number from 1 to 91 and their coding sequences. The proteins and coding sequences are useful for preventing or treating disorders or syndromes e.g. atherosclerosis, hypertension, obesity or cancer. NOV19 a spinster-like protein and its coding sequence maps to chromosome 17.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        CCCGGCACCCCCGGCACCCCCGGCTGCCGCTACTGCAAAGGGCCCCGGCGCTCAGCAGGCGCTCAGCAGGCCCCGGCGCTCAGCAGGCCCCGGCGCTCAGCAGGCCCCGGCGCTCAGCAGGCCCCGGCGCTCAGCAGGCCTGCAAAGGGCCCCGGGCCTCAGCAG

The present sequence is transporter and ion channel-9 (TRICH-9) cDNA.

TRICH is used as vaccine. TRICH is useful for treating a disease or condition associated with decreased expression of functional TRICH, such as transport disorder including amyotrophic lateral sclerosis, cystic fibrosis, Becker's muscular dystrophy, Charcot-Marie Tooth disease, Duchenne muscular dystrophy, angina and hypertension, neurological disorders including Alzheimer's disease, amnesia, bipolar disorder, dementia, depression, epilepsy, ischaemic cerebrovascular disease, anticolar disorders including Alzheimer's pick's disease, mental disorder, muscle stroke, cerebral neoplasms, Pick's disease, mental disorder, including cardiomyopathy, myocarditis, polymyositis, andit respiratory distress syndrome (ARDS), allorgies, including ALDS, adult respiratory distress syndrome (ARDS), allorgies, anaemia, diabetes mellitus, rheumatoid arthritis, scleroderma, Sjogren's syndrome, systemic lupus erythematosus and other diseases including sickle cell anaemia, Wilson's disease, cataracte, infertility, pulmonary arter, stenosis, Grave's disease, Cushing's disease, Addison's disease, calcaractes, infertility, bulmonary arcer, stenosis, date will be some syndrome, hypercholesterolaemia, cancers psoriasis and viral, bacterial, ingene therapy and in diagnostic

The DNA and protein sequences of the invention are useful as: markers for tissues in which the corresponding protein is preferentially expressed; as molecular weight markers on gels; as chromosome markers or tags; to identify chromosomes or to map related gene positions; and to compare with endogenous DNA sequences in patients to identify potential genetic disorders. The present DNA sequence represents a gene of the
